

Make your own Wedding Rings

Making you own wedding rings is such a wonderful experience, one to be treasured. We can make your day very special, by photographing you working and making a video of the photos so that you can share these with your friends and family.

The day starts at our wonderful rural studio in the heart of Yorkshire, near York. We have lots of free parking and a spacious clean studio.

We will check your ring sizes and you will start to measure, saw, file and refine your rings, before soldering finishing and polishing them.

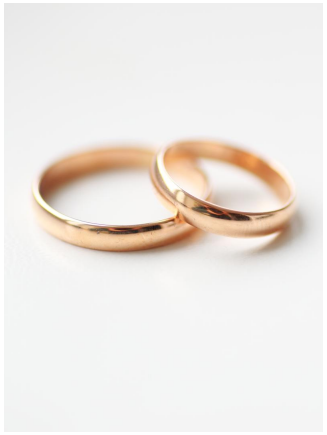

Let's talk!
